

Senior iOS Software Engineer

(m/f/d) Barcelona

Your core tasks_

- Development of new and existing iOS apps at the highest professional and technical level for well-known and world-leading companies in the agile environment
- Participation in the technical conception and coordination of the backend interfaces
- Advising the product owner on the creation of user stories and the UX team on the design of user interfaces
- Use of innovative technologies such as artificial intelligence and cloud services
- Evaluation of new third party components and trends
- Quality assurance through unit, system and integration tests

We expect from you_

- Completed studies in computer science, digital media or equivalent experience
- Good knowledge of programming with Swift and possibly Objective-C as well as knowledge of XML and JSON
- Experience with the common development environment Xcode
- Experience in connecting service interfaces, especially web services and RESTful Services
- Experience with the Apple frameworks UIKit, Foundation, CoreData and CoreGraphics
- Basic knowledge about the integration of wearables and bluetooth devices
- Up-to-date know-how about iOS technologies and frameworks
- Experience in the creation of app architectures
- Knowledge of CI (Jenkins) and source code management (Git)
- Some experience with agile methods (Scrum)

You can expect from us_

- Full-time employment
- A great and motivated team of experts
- Innovative projects and great opportunities for further education
- Beautiful offices in a central location at 22@, Barcelona
- Good connection to public transport
- Variety of lunch offers in the neighborhood
- Good work-life balance and flexible working hours
- Free drinks (coffee, water, juices)
- Employee Benefits with Banco Sabadell
- Employee Benefits for further education by Grupo Planeta
- Access to DATAGROUP SE corporate benefits program

Almato is a 100% subsidiary of the listed DATAGROUP SE. The company is one of the leading providers of software and services for the intelligent digitalization of companies. With the Almato ONE platform, companies automate and mobilize their business processes.

Almato maintains partnerships as a value-added reseller with globally important technology providers such as Abbyy, Automation Anywhere, Nuance, SAP, and UiPath and employs more than 120 people at locations in Barcelona, Hamburg, Stuttgart, and other locations in Germany.

Do you work with enthusiasm and a good mood, and do you enjoy dealing with people? Then send us your application.
